**PLEASE ASK YOUR SERVER ABOUT OUR SEASONALS AND DRAFTS**

\*IBU is an empirical measurement, measured in parts-per-million (ppm) of isohumulone (which is the main chemical compound derived from hops that makes your beer taste bitter) in a given volume of beer. Isohumulone is created when the alpha acids in hops isomerize (basically dissolve or breakdown) in the boil. That's it. Literally. For the novice – International Bitterness Unit. \*\*Denotes Gluten Free
